

NATHAN D. BRENTON

FULL-STACK SOFTWARE ENGINEER | PYTHON, REACT & TYPESCRIPT | LINUX

Orange County, CA | nbrenton@gmail.com | nathanbrenton.com | linkedin.com/in/nathanbrenton | github.com/nathanbrenton

SUMMARY

Software engineer with an enterprise systems engineering background, building full-stack applications with Python, FastAPI, React, TypeScript, PostgreSQL, REST APIs, Docker, and automated testing. Combines application development with professional Linux platform, deployment, troubleshooting, monitoring, and production-reliability experience.

SKILLS

PROGRAMMING & SCRIPTING: Python, TypeScript, JavaScript, scripting fundamentals

FRONTEND DEVELOPMENT: React, Vite, complex user workflows, CSS, HTML, responsive web design

BACKEND & APIS: FastAPI, REST APIs

DATABASES & DATA: PostgreSQL, SQLAlchemy, Alembic, data inheritance, SQL

TESTING & QUALITY: Playwright, pytest, Vitest, validation, software quality assurance

DEVOPS & TOOLING: Docker, containerized services, Git, deployment automation, remote application deployment

SYSTEMS & INFRASTRUCTURE: cron, Linux, RHEL 9, systemd

EXPERIENCE

System Engineer I

Roth Staffing Companies, L.P. — Pacific Life Insurance

Feb 2024 – Mar 2026

Newport Beach, CA

- Automated remote Tomcat/TomEE deployments and browser-based developer log access, reducing manual release and troubleshooting steps.
- Automated middleware startup, recovery, and validation with Bash, systemd, cron, and reusable service checks.
- Assisted developers with virtual hosts, Tomcat deployments, connection pools, and application log analysis.

Jr. Deskside Technician

Randstad Technologies, LLC — Pacific Life Insurance

Aug 2022 – Jan 2024

Newport Beach, CA

- Automated hardware and software validation checks with PowerShell to improve fulfillment consistency.
- Troubleshoot application, access, device, and network incidents using ServiceNow, Splunk, SCCM/MECM, and Active Directory.

PROJECTS

SignalStack AI News Intelligence Platform

github.com/nathanbrenton/signalstack.git

- Developed a FastAPI/PostgreSQL AI retrieval platform using sentence-transformer embeddings, hybrid search, and scikit-learn classification.
- Exposed FastAPI endpoints for search, ingestion, dashboard stats, RSS controls, and ML predictions.

Metadata Editor / Media Processing Workspace

- Developed a React/TypeScript metadata application with release/track inheritance, overrides, validation, ingest inspection, staged workflows, and a FastAPI service layer.
- Developed release- and track-level metadata workflows with inheritance, validation, and staged build planning.

Century Solar Business Operations Platform

- Developed a React/TypeScript, FastAPI, and PostgreSQL portfolio platform with complex workflows and automated test coverage.
- Built FastAPI/React workflows for accounts, inventory, fulfillment, equipment, and service operations.

EDUCATION

M.S. Software Engineering — AI Engineering, Western Governors University

Completed Apr 2026

B.S. Cybersecurity and Information Assurance, Western Governors University

Completed Oct 2023

Front-End Web Developer Nanodegree, Udacity

Completed May 2019

CERTIFICATIONS

CompTIA CySA+ ce Expires Aug 2029

ITIL 4 Foundation Issued Jun 2021

CompTIA Project+ Issued Jan 2022
